[github.com/julianoalberto](https://github.com/julianoalberto)

I have over 14 years of experience in the software industry, of which nine as a Java developer and the last five focused on DevOps with some minor assignments in quality assurance and development.

Therefore I have a clear understanding of the software life cycle and was there when projects started moving from waterfall to Agile, from Ops to DevOps and from hosted servers to the cloud.

At the moment, I'm interested in automating tasks that no one sees but have to be done. And my studies are focused on Kubernetes, Python and AWS.

### Career

#### Airbus - Jan 2020 to Jun 2020

As a subcontractor of CGI, I joined the Airbus DevOps team responsible for the company's API ecosystem in Toulouse, France.

Developed Docker images, scripts and Kubernetes cronjobs for backup of databases, GitHub repositories and Jenkins data. **Key skills: Docker, Kubernetes, bash, Python, AWS.**

Updated Docker images and Kubernetes deployments to eliminate the use of root user at runtime. **Key skills: Docker, Kubernetes.**

Created Python scripts to consume API usage logs and aggregate information to feed the system responsible for the monetization of APIs, as well as the related Kubernetes deployments and configurations. **Key skills: Docker, Kubernetes, Python, RabbitMQ, Redis, Ansible.**

#### IBM Brazil - Oct 2019 to Dec 2019

Developed an API for the dashboard of a user management application. **Key skills: PHP, PostgreSQL, Docker.**

#### IBM Brazil - Apr 2019 to Oct 2019

Joined a quality assurance team to assist with the development of automated tests for a web application. **Key skills: Selenium WebDriver, TestNG, Java, quality assurance.**

#### IBM Brazil - Aug 2016 to Apr 2019

Implemented Jenkins from scratch and automated around 85 percent of builds and deployments. **Key skills: Jenkins, bash, Ant.**

Participated in the migration of one application to IaaS servers on IBM Cloud. This included the adoption of Ansible to manage the new servers' configurations. **Key skills: Ansible, IBM Cloud, bash.**

Created a dashboard for L1 support team with alerts for critical errors using logs from several sources. **Key skills: Elasticsearch, Logstash, Kibana, Docker.**

Designed and created a chat bot intended to assist L1 support team in resolution of issues. **Key skills: IBM Conversation service.**

#### **IBM Brazil - Oct 2014 to Aug 2016**

Implemented Jenkins and created build and deployment jobs for a Java web application.

**Key skills:** Jenkins, Ant, Java, bash, DB2.

#### **IBM Brazil - Aug 2005 to Oct 2014**

Throughout this time, I worked in the maintenance of at least ten internal projects with a similar pattern: Java application running on IBM WebSphere Application Server backed by IBM DB2 database. In some of these, I acted as the lead developer and was responsible for client facing meetings to discuss scope and requirements. **Key skills:** Java, Servlets, JDBC, JSP, Javascript, DB2.

#### **Miscellaneous**

- Bachelor's Degree, **Computer Science**, 2002-2005 at Centro Universitário de Jaguariúna – UniFAJ (Brazil).
- **Sun Certified Programmer** for the Java 2 Platform, Standard Edition 5.0.
- **Sun Certified Web Component Developer** for the Java 2 Platform, Enterprise Edition 1.4.
- **Brazilian Portuguese** is my **native** language and I also speak **English fluently**.
- If you need **references** about me, please send me an email and I can give you some contacts. I don't put them here to preserve their privacy.
- Born on November 14th, 1980
